## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 rejected under 35 U.S.C. 103(a) as being unpatentable over Paulovich et al 6,523,724 in view of Barnby et al 2,254,815.

Paulovich et al show a venting closure comprising a neck 166 and patch 420. Paulovich et al lack the patch having an aperture. Barnby et al show a patch having an aperture 23 to permit excessive gas pressure to be released (page 1, right column, lines 22-27). It would have been obvious to one of ordinary skill in the art to have modified the Paulovich et al patch with an aperture as taught by Barnby et al to permit excessive gas pressure to be released.
